

GTA-10

GLOVE TEST ADAPTER

The Ford-approved LPLT-100 is also perfect for testing insulated gloves. OSHA requires the gloves to be tested before each use. Methods of rolling the glove or pumping up the glove and dipping in water are time consuming and/or inaccurate.

When equipped with the optional GTA-10 adapter, The LPLT-100 can accurately confirm the integrity of a glove within seconds. This patent pending glove test adapter (P/N: 40100170) comes with two different sized discs to fit all gloves, all in a convenient carrying case for portable and protective storage. Also included is a dock magnet that mounts to the side of the LPLT-100 for a hands-free test.

LPLT-100 Battery Pack Leak Tester not included.
