

CART ASSEMBLY INSTRUCTIONS

NOTE: Parts marked with colored dots go on the same side of the cart.

Attach back cart panel using three (3) of the enclosed bolts through bottom panel of cart. Flip cart onto its side to tighten bolts.

Attach angle brackets using four (4) of the enclosed bolts for each side. Two (2) to connect it to the back panel and two (2) through the bottom. Flanges on angle brackets should face outward.

Insert handles into handle channels on back panel of machine. Secure handles using four (4) bolts and nuts.

Assemble and secure toolbox holder brackets into place. Locate the four (4) mounting holes on the bottom corners of the toolbox.

Secure toolbox to brackets using four (4) enclosed 10-24 allen bolts and washers through bottom of bracket into jacknuts at all four corners of the toolbox.

SAFETY FIRST - ALWAYS USE HAND AND EYE PROTECTION!

- 1.** Remove power steering cap (and screen if applicable). When using a pre-cleaner, add to reservoir, turn on engine, turn steering wheel lock to lock (left until it stops and then right until it stops). Turn steering wheel back to center, turn engine off.
- 2.** Fill new fluid bottle with specified fluid, or if using Service Kit bottle, attach to new fluid cap/inlet tube. Make sure used fluid bottle is empty and attach to used fluid cap/inlet tube.
- 3.** Attach the exchanger's battery clips to the vehicle's battery terminals. (Make sure the polarity is correct).
- 4.** Turn both pumps on for a few seconds to prime and evacuate air in system.
- 5.** Insert the single tube of the included Y-adapter into the power steering reservoir.
- 6.** Start the vehicle's engine.
- 7.** Turn used fluid pump on. Turn steering wheel lock to lock several times.
When used fluid has been evacuated, turn used fluid pump off.
- 8.** Turn new fluid pump on. Turn steering wheel (lock to lock) several times.
When fluid level is correct, turn off new fluid pump.
- 9.** Repeat steps #7 and #8 until new fluid bottle (or Service Kit bottle) is empty.
(NOTE: If adding an additive at the end of the exchange, leave necessary space in the reservoir).
- 10.** Turn off engine, disconnect battery clips, replace reservoir cap and screen.

DISPOSE OF USED FLUID IN ACCORDANCE WITH LOCAL, STATE AND FEDERAL REGULATIONS.
